

TSOP

Anti-Rotation Level Compensators

The TSOP and TSOG series spring systems are anti-rotation spring systems. They are used for horizontal handling of parts at different levels. The anti-rotation function ensures that objects are always gripped in the same position. The TSOP range is designed for applications requiring very precise handling.

- The hexagonal rod prevents the suction cup from rotating.
- Protected spring.

Characteristics - TSOP

Note: All dimensions are in mm

C = Stroke

k = Spring stiffness

Frep = Force at rest

Materials

- Spring** Stainless steel
- Tubing** Anodized aluminum
- Slider** Nickel-plated steel

TSOP 4

Please specify the part e.g.: TSOP140
See part n° table above.
